L7	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
٧.	citations and explanations supporting such statement

Statement			YES
Novelty (N)	Claims		YES
	Claims	1-11	NO
Inventive step (IS)	Claims		YES
	Claims	1-11	NO
Industrial applicability (IA)	Claims	1-11	YES
	Claims		NO

2. Citations and explanations

Document 1: CA 2086565 A (S.S. Pharmaceutical Co.,

Ltd.), 1 July 1994

Document 2: JP 2000-53529 A (Shiseido Co., Ltd.), 22

February 2000

Document 3: JP 11-92326 A (Shiseido Co., Ltd.), 6 April

1999

Document 4: JP 6-80564 A (Meiji Seika Kaisha, Ltd.), 22

March 1994

Document 5: JP 54-138130 A (Yugen Kaisha Kiguchi), 26

October 1979

[1] The inventions set forth in claims 1 to 11 lack novelty in the light of documents 1 to 3 cited in the international search report.

Document 1 discloses an orally administered therapeutic agent for treating pigmentation which contains tranexamic acid and ascorbic acid as active ingredients. In addition, document 1 (page 1, lines 14 and 15) also states that L-cysteine is conventionally used as an orally administered therapeutic agent for treating pigmentation, and thus, a therapeutic agent for treating pigmentation which contains tranexamic acid, L-cysteine, and ascorbic acid as active ingredients can be said to be disclosed in document 1.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/JP 03/17050

Thus, the inventions set forth in the present claims 1 to 11 lack novelty in the light of document 1.

Similarly, documents 2 and 3 can be said to disclose topically administered therapeutic agents for treating pigmentation which contain tranexamic acid, L-cysteine, and ascorbic acid as active ingredients (document 2, claims and paragraph [0002]; document 3, claim 1 and paragraph [0003]).

Thus, the inventions set forth in the present claims 1 to 10 lack novelty in the light of documents 2 and 3.

[2] The inventions set forth in claims 1 to 11 do not involve an inventive step in the light of documents 4 and 5 cited in the international search report.

Document 4 discloses an orally administered therapeutic agent for treating pigmentation which has tranexamic acid and ascorbic acid as active ingredients, and although document 4 does not make any disclosures which pertain to L-cysteine, document 5 indicates that L-cysteine can be administered orally and that it is effective in the treatment of pigmentation. Thus, a person skilled in the art could easily conceive of mixing L-cysteine into the therapeutic agent for treating pigmentation disclosed in document 4.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/JP 03/17050

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1, 2, 5, and 6 include as active ingredients "derivatives [thereof]," which encompasses an extremely large number of compounds. However, only a very small portion of the claimed compounds is disclosed in the sense of PCT Article 5, and these compounds are not fully supported in the sense of PCT Article 6.
